

WIELTORIA 370 Row Boat

Technical description

WIELTORIA 370 row boat is made of polyester glass laminate with the use of geolcoat and resin which have very good hydrolysis resistance. The hull has glass laminate and foam pvc reinforcements on stem and keels. Stern of the boat is prepared for an electrical or fuel engine up to 4hp assembling.

Boat is equipped with:

- two aluminium rowlocks,
- three plastic cleats.

There is a possibility to mount various brackets, cleats, rod holders, grab rails, bimini tops and awning.

There are two basic versions of the boat:

L - minimum

S - standard.

Board of the L version boat is equipped with wooden bench and displacement boxes. Displacement box on stern has locker inside. Board of S version is equipped with laminate rower bench with one-lid (optionally with three lids) locker and lockers in displacement boxes on bow and stern.

WIELTORIA 370 row boat is manufactured in three types:

F - fishing rowing boat for anglers

R - pleasure rowing boat for recreational rowing

P - power rowing boat for transport.

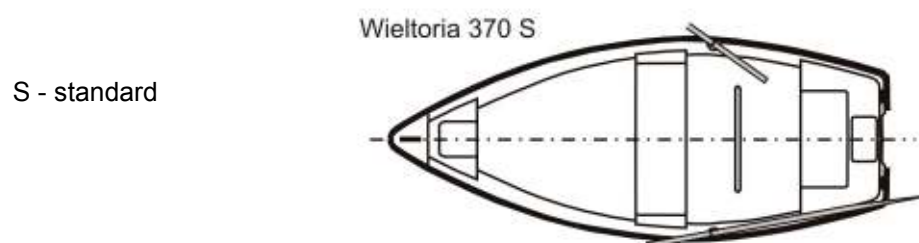

Types differ in boards and equipment.
